

Before.

After.

KICKSPACE® The space saving solution.

Clever by design, the **KICKSPACE®** unit fits neatly within a unit plinth or floor cavity providing a fresh thinking, innovative heating solution. Where traditional radiators take up precious wall space and restrict design possibilities, the **KICKSPACE®** heater allows freedom to tailor your home around your lifestyle. Central heating, electric and duo models available. **All units are now supplied complete with a white grille.**

The **KICKSPACE®** can also be used alongside the **MYSON PETITE** towel rail to provide the perfect drying and heating solution for any kitchen. For information on the **MYSON** range of towel warmers please contact Customer Services.

Effective climate control.

KICKSPACE® works by drawing room air over the heated fins of the unit heat exchanger and projecting warm air back into the room. Controls are situated on the front grille, with the unit having a choice of heating fan speeds (winter setting) as well as a fan-only (summer setting) operation. Alternatively, a remote control wall switch can be fitted to central heating and duo models for extra control and convenience.

KICKSPACE® Floor model.

KICKSPACE® Applications.

The kitchen is often where space is most at a premium and the **KICKSPACE®** can deliver the most benefits but equally, the bathroom or hallway can offer alternative applications. All versions, except the floor model, are designed to be installed horizontally into recessed locations. They require an adequate supply of inlet air and the axis of the motor must remain horizontal.

Accessories.

The unit **grille** and **remote wall switch** can be customised to suit any room décor with a variety of metallic and colour finish options.
